

MicroFragranceFogger

Bird Repellent Delivery System

Natural Forces, LLC. makes bird control easy, safe and effective.

Stops bird roosting both indoors and out!

- Shopping malls, stadiums, restaurants, cafes, atriums, patios, pools, garages, marinas, packing houses, warehouses, barns, stables, landfills, transfer stations and more.

The Micro Fragrance Fogger delivery system is great for discreetly eliminating bird roosting from smaller targeted settings like rafters, patios and outdoor cafes. It uses a dry-air technology that spreads a time-released, bird-repelling fragrance without the use of sprays, aerosols or heated oils.

The Micro Fragrance Fogger uses liquid Fog Force® bird repellent in a reusable cartridge. A built-in fan pushes air across the cartridge creating a narrow stream of fragrance quietly and discreetly.

The Micro Fragrance Fogger can be positioned and aimed for targeted use while a variable-timed motion sensor detects bird activity and activates the unit. The Micro Fragrance Fogger offers multiple installation options and is easy to maintain.

- **Area Covered:** Directional fragrance delivered up to 15 ft. away.
- **Use Rate:** Fragrance typically lasts 30 days depending on bird pressure.
- **Package Size:** Holds 2 oz. of Fog Force® bird repellent.

Technical Specifications

Dimensions	5" H x 3" W x 4" D
Weight	0.5 lbs.
Cartridge Life	Approx. 300 hours or 30 days
Variable Motion Cycle Time	15 Seconds MIN/ 180 Seconds MAX
Motion Sensor	Up to 25 Ft. with a 150° Radius
Power Consumption	3 Watts
Power Requirements	12V DC Supplied with 110V AC external power transformer (UL/CE listed)
Auxiliary Power Out	12V DC

Various AC plug configurations are available. Solar power and battery power available!

MicroFragranceFogger Bird Repellent Delivery System

The Three Keys To Success

Location

- Mount Micro Fragrance Fogger in areas where birds roost.
- Direct air flow within 15 feet of roosting area.
- Direct motion sensor at areas of bird movement.
- May be installed indoors or covered outdoor areas.

Air Flow

- Identify the direction of dominant air flow.
- Place the Micro Fragrance Fogger "upwind" from birds.
- Install in areas of limited or stagnant air flow for maximum effect.
- Do not place in large open areas or areas with heavy air flow. Doing so dilutes the Fog Force®.

Power Source

- Can be powered by alternate power sources depending on application. i.e. AC, DC, solar.
- Low wattage power requirements allow for solar or battery power.
- Various AC plug configurations available for international use.

Easy To Install, Easier To Maintain

1. Select proper placement of Micro Fragrance Fogger to ensure that the directional fan delivers the fragrance to the birds.
2. Mount the system using provided mounting brackets and hardware, or place on firm and secure horizontal platform.
3. Attach power source as required per application.
4. Set the Micro Fragrance Fogger pointed at the roosting areas. Motion detector activates unit when birds are present.
5. Simply refill the cartridge with Fog Force® as needed.
